

RescomX was created to meet the unique needs of insurers and their policyholders in the FL market. Our roots and relationships are firmly established in the publicly-traded home builder sector. This affords us unique capabilities which create a winning outcome for insurers, their policyholders, and RescomX as a strategic partner.

Benefits to Insurers

- **Control of Supply Chain**

Our manufacturers for flooring, cabinets, and building materials fast track orders and keep inventory on hand for dedicated SKUs not publicly available. **This can shorten the repair process by weeks or more.**

- **Control of Labor Pool**

Our trade partners have long-term contracts versus one-off job assignments. Our relationships are generational and we keep these team members fully engaged year-round. **This means higher quality workmanship by more experienced tradespeople.**

- **Self-Performing/Curb to Roof**

We are the single point of contact and accountability to perform all work from a minor claim to full reconstruction. **This eliminates multiple contractors needed to get the job done right.**

- **Minimize Scope Creep**

We pride ourselves on getting it right the first time to minimize requests for supplements. **Makes for more accurate reserving and budgeting.**

- **Insurance and Construction Expertise**

Our leadership has decades of experience and our Advisory Board members are respected Insurance Leaders.

- **Eliminate the Middleman**

We are privately owned and are not part of a network nor a franchise organization. **We can afford to perform to higher standards because of our cost structure.**

- **Higher Policyholder Satisfaction**

We measure twice and cut once. **We provide a 100% Customer Satisfaction Guarantee.**

- **Financially Strong**

Our owners and investors are committed to funding the growth of our businesses and have more than sufficient resources to do so. **We have deep connections to the FL communities we serve, we are focused only on FL, and our stellar reputation is our lifeblood.**

We back our commitments and promises with Service Level Agreements
