

RescomX was created to meet the unique needs of policyholders in the FL market. Our roots and relationships are firmly established in the Florida home builder sector. This affords us unique capabilities which create a winning outcome for policyholders.

***Have your repairs and reconstruction performed by the same tradespeople who work for The Four Seasons Residences, Ritz-Carlton Residences, Taylor-Morrison Homes, Neal Communities, Lennar and other prestigious residential builders.***

### **Benefits to Policyholders**

- **Control of Supply Chain**

Our manufacturers for flooring, cabinets, and building materials fast track orders and keep inventory on hand for protected product lines. **This can shorten the repair process by weeks or more.**

- **Control of Labor Pool**

Our trade partners have long-term contracts versus one-off job assignments. Our relationships are generational, and we keep these team members fully engaged year-round. **This means higher quality workmanship by more experienced tradespeople.**

- **Self-Performing/Curb to Roof**

We are the single point of contact and accountability to perform all work from a minor claim to full reconstruction. **This eliminates multiple contractors needed to get the job done right.**

- **Eliminate the Middleman**

We are privately owned and are not part of a network, nor a franchise organization who have to pay royalty and/or membership fees. **We can afford to perform to higher standards because of our cost structure.**

- **Higher Policyholder Satisfaction**

We measure twice and cut once and get it right the first time. **We provide a 100% Customer Satisfaction Guarantee.**

- **Financially Strong**

Our owners and investors are committed to funding the growth of our businesses and have more than sufficient resources to do so. **We have deep connections to the FL communities we serve, we are focused only on FL, and our stellar reputation is our lifeblood.**

***We back our promises and commitments with our reputation!***
